Join our webinar on **December 9** at **15:00 (CET)** and be inspired from ongoing applications on the outstanding Ossabaw pig, the most complete and human-translatable animal model of obesity and its comorbidities.

Register [here](#).

The webinar will start at **15.00 (CET)**.

Ossabaw pigs are currently at work in a various research projects across Europe. Get the latest news and results from the applications, and get updated on the availability of pigs in Europe:

1. **Welcome and status on *The European Ossabaw Facility*.**
Peter Heegaard, Professor Innate Immunology, M.Sc., Ph.D., DTU Ossabaw Facility Manager
2. **The translation of new therapies for portal hypertension – the need for more relevant models for NASH and inflammation superimposed on cirrhosis**
Raj Mookerjee, Professor of Translational Hepatology, BSc (Hons) MBBS PhD FRCP, University College London, UK
3. **The Ossabaw pig in translational cardiovascular research: Characterization of Heart Failure (HFpEF) phenotypes**
Jakob Balitzki, Doctorate, Research & Development, Pharmaceuticals, Heart and Vascular Diseases IV, Bayer AG, Germany
4. **Metabolic bioimaging of the Ossabaw pig brain**
Mathilde Hauge Lerche, Senior Researcher, Department of Health Technology, DTU

We will finish no later than **16.00 (CET)** including time for Q&A after each presentation.

Please feel free to forward this invitation to your interested colleagues/colleagues.

The webinar will be recorded and made available for anyone interested after the webinar.
